**NK**<sup>TM</sup>

THE RELIABLE PART

# Brand new ... many kilometers ahead

We have never been in doubt that NK spare parts meet the market's strictest demands to quality and durability.

Therefore, a few years ago, we introduced one of the widest guarantees in the aftermarket: 5 years against defects in material and workmanship. Now we go one step further by introducing a wear guarantee on NK disc brake pads.

**We guarantee that a set of NK disc brake pads can last for min. 35,000 km.**

If the brake pads are worn to the wear limit before that, we will offer a new set free of charge.

We have introduced a logo for the new guarantee that you can find on the packaging.

# After 35,000 km ... worn, but still fit

NK offers one of the widest brake pad ranges for passenger cars and LCVs in the European market. Our range covers models back from the 1980s and until today.

NK brake pads ensure safety and stability under all driving conditions. They are durable and comfortable with a low noise level. They are "Matching Quality" with dimensions and accessory parts according to OE replacement, ensuring trouble-free fitting and functionality. Further NK brake pads are tested and approved according to relevant safety standards such as ECE R90.

*The 35,000 km guarantee becomes valid by returning the brake pads with documentation for driven kilometers at time of replacement with the garage's stamp. For example, copy of the service book of the car can be used as documentation.*

**We want to be the best at  
providing the spare parts  
you need.**
